## Industry

Architecture

## About Client

Our client is in architecture designing industry. Our client is a young design-led architectural practice delivering architecture, refurbishments, interior architecture schemes and master plans across the UK and Europe. Our client is able to deliver innovative and bespoke solutions to their customers that generate economic and social interaction within the private and public realms.

## Challenge

Our client approached us with the requirement of small CMS website dedicated to its architecture designing industry. The website should be able to address its targeted audience and should be able to showcase the projects that our client has worked on. Below are the listed key requirements of the clients.

## Key Requirements

- Small CMS website.
- Should be able to address its industry and targeted audience.
- Should integrate the projects portfolio of the project's that our client's has worked on.
- Client should be able to manage the portfolio, images and other contents from his end.
- Requirement of Flash for projects portfolio and home page.

## Technologies

- Asp.net 2.0
- MS SQL

## Tools

- Flash
- Photoshop

## Solutions Offered by Concept Infoway

- Deployment of CMS website best attuning the client's requirements.
