# Rickshaw – Windows Phone 7

---

## Industry

Windows Phone 7 App for Travel & Tourism industry

## Client

In-house application

## About – Brain Tap

Rickshaw is a Windows Phone 7 App designed for a traveler to calculate the exact Auto Rickshaw Meter Fare charges for cities such as Ahmedabad, Mumbai, Pune and Delhi, India. The app is designed specifically to calculate the accurate Auto Rickshaw Meter charges of different cities. It also allows the user to automatically calculate the accurate special night tariff charges of the relevant city.

The user just has to insert the Meter units in the app, and the Rickshaw App will automatically calculate the accurate tariff the user has to pay. Irrespective to whether its day or night, the app will automatically come-up with the accurate fare charges, ensuring that the user has to face fewer overhauls.

## Features

- Specially designed for Windows Phone 7
- Easy to user interface
- Simply add the rickshaw meter unit numbers in the app and get the exact tariff, instantly.
- Automatically get the special night tariff charges.
- Designed to work in four major cities of India including Ahmedabad, Mumbai, Pune and Delhi.
- Planned upgrade to add new cities, soon.
- Free to download
